

Learning Operating System of the ANCR™ Ecosystem — Engineering Reference

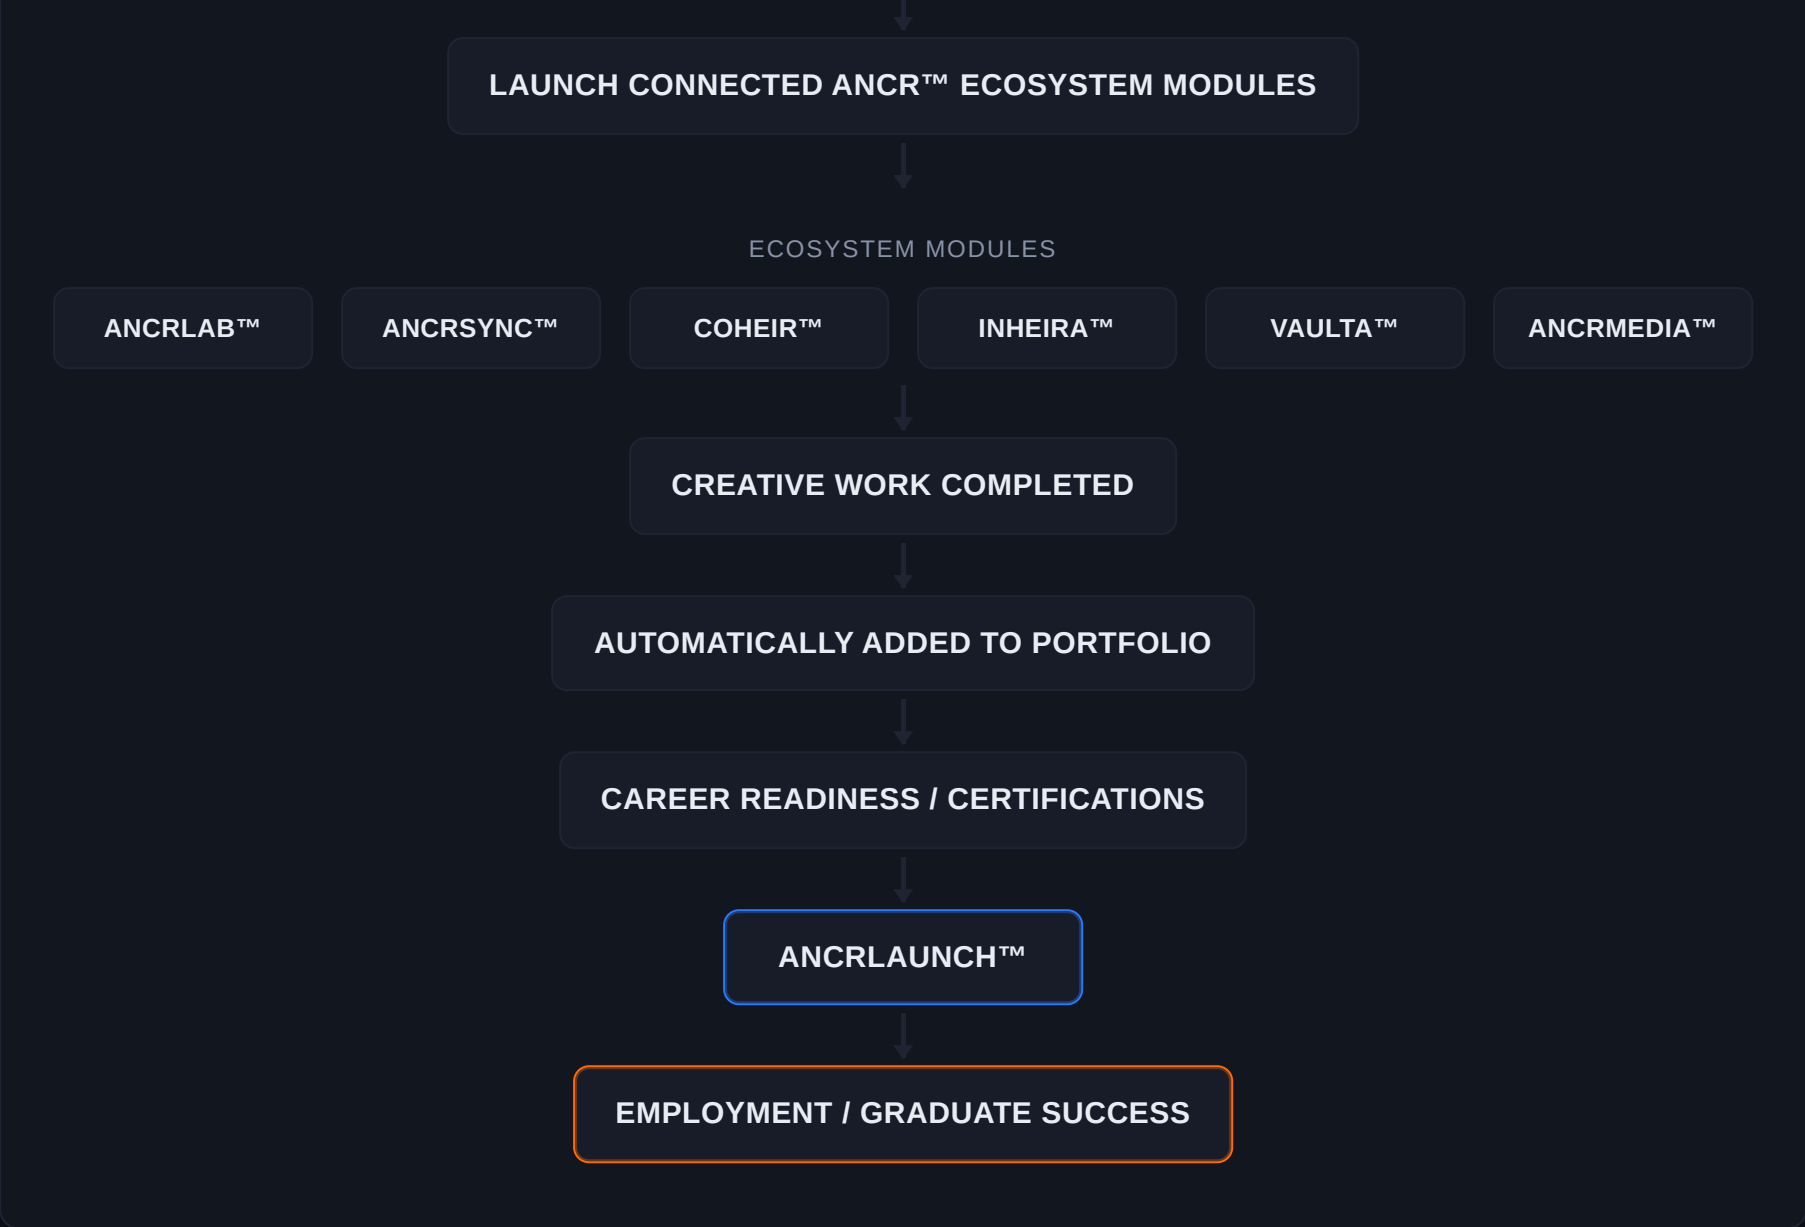

Prepared for: Tech Team System: ANCRA™ (within CCDP / ANCR) Doc type: User Flow Specification

PURPOSE

This document maps the end-to-end ANCRA™ user journey — from initial entry through CCDP to ecosystem module launch and career outcomes — for engineering reference. It reflects the current approved flow and is intended as the base spec for build-out, QA, and integration planning across the connected ANCR™ ecosystem modules.

FULL FLOW DIAGRAM

STAGE-BY-STAGE BREAKDOWN

STAGE	ELEMENT	DESCRIPTION
ENTRY	Visit CCDP	User arrives via CCDP website or an institutional access point.
AUTH	Sign In / Create ANCRID™	User signs in or creates an ANCRID™ account — the single identity credential used across the ecosystem.
AUTH	Authentication (ANCRID™)	Credential is authenticated, then routed by account type.
ROLE	Student / Faculty / Administrator	Three account types branch from authentication into the same dashboard, with role-based permissions and views.
HOME	ANCRA™ Home Dashboard	Central hub all roles land on after authentication.
DASHBOARD	My Journey™ / Courses / Studios / Projects / Assignments	Five parallel entry points from the dashboard into the working environment.
CORE	Creative Learning Experience	Shared destination for all dashboard entry points; the primary working layer of ANCRA™.
CORE	Lessons / Collaboration / Feedback / Portfolio	Four functional pillars of the Creative Learning Experience.
AI	AIAH™ Intelligent Assistance	Sits downstream of the four pillars; provides coaching, feedback, and recommendations before ecosystem modules are launched.
ECOSYSTEM	Launch Connected ANCR™ Ecosystem Modules	Gateway from ANCRA™ into the six connected ecosystem products.
ECOSYSTEM	ANCRLAB™ / ANCRSYNC™ / COHEIR™ / INHEIRA™ / Vaulta™ / ANCRMEDIA™	Six modules covering creative studio work, collaboration projects, mentorship, rights & publishing, financial resources, and view/WAV media respectively.
OUTPUT	Creative Work Completed → Portfolio	Completed work is automatically added to the user's portfolio — no manual upload step in this flow.

OUTPUT	Career Readiness / Certifications	Portfolio state feeds career-readiness and certification status.
EXIT	ANCRLAUNCH™	Final platform stage before the user exits into employment or graduate outcomes.
EXIT	Employment / Graduate Success	Terminal node of the flow.

CONNECTED ECOSYSTEM MODULES — REFERENCE

All six modules operate under the ANCR™ ecosystem umbrella — Discover. Develop. Deploy.

ANCRLAB™ Creative Studio	ANCRSYNC™ Collaboration Projects
COHEIR™ Mentorship	INHEIRA™ Rights & Publishing
VAULTA™ Financial Resources	ANCRMEDIA™ View / WAV Media

Build note — Authentication (ANCRID™) is the single identity layer that gates entry to the Home Dashboard for all three roles. Confirm role-based permissioning is enforced at the dashboard layer, not just at sign-in, since Student / Faculty / Administrator views diverge downstream while sharing the same entry stages.

OPEN ITEMS FOR TECH TEAM

AREA	QUESTION
PORTFOLIO	Confirm trigger logic for "automatically added to Portfolio" — real-time on completion, or batch sync.
AIAH™	Confirm whether AIAH™ runs on every pass through the Creative Learning Experience or only at defined checkpoints.
MODULES	Confirm which of the six ecosystem modules are live vs. placeholder for initial launch scope.
ANCRLAUNCH™	Confirm data handoff from Career Readiness / Certifications into ANCRLAUNCH™.

CCDP DELIVERS THE EXPERIENCE. ANCR POWERS THE ECOSYSTEM. TOGETHER WE BUILD CAREERS.
