ANCRD™ MASTER FLOW

Single Sign-On Architecture for the ANCR™ Ecosystem

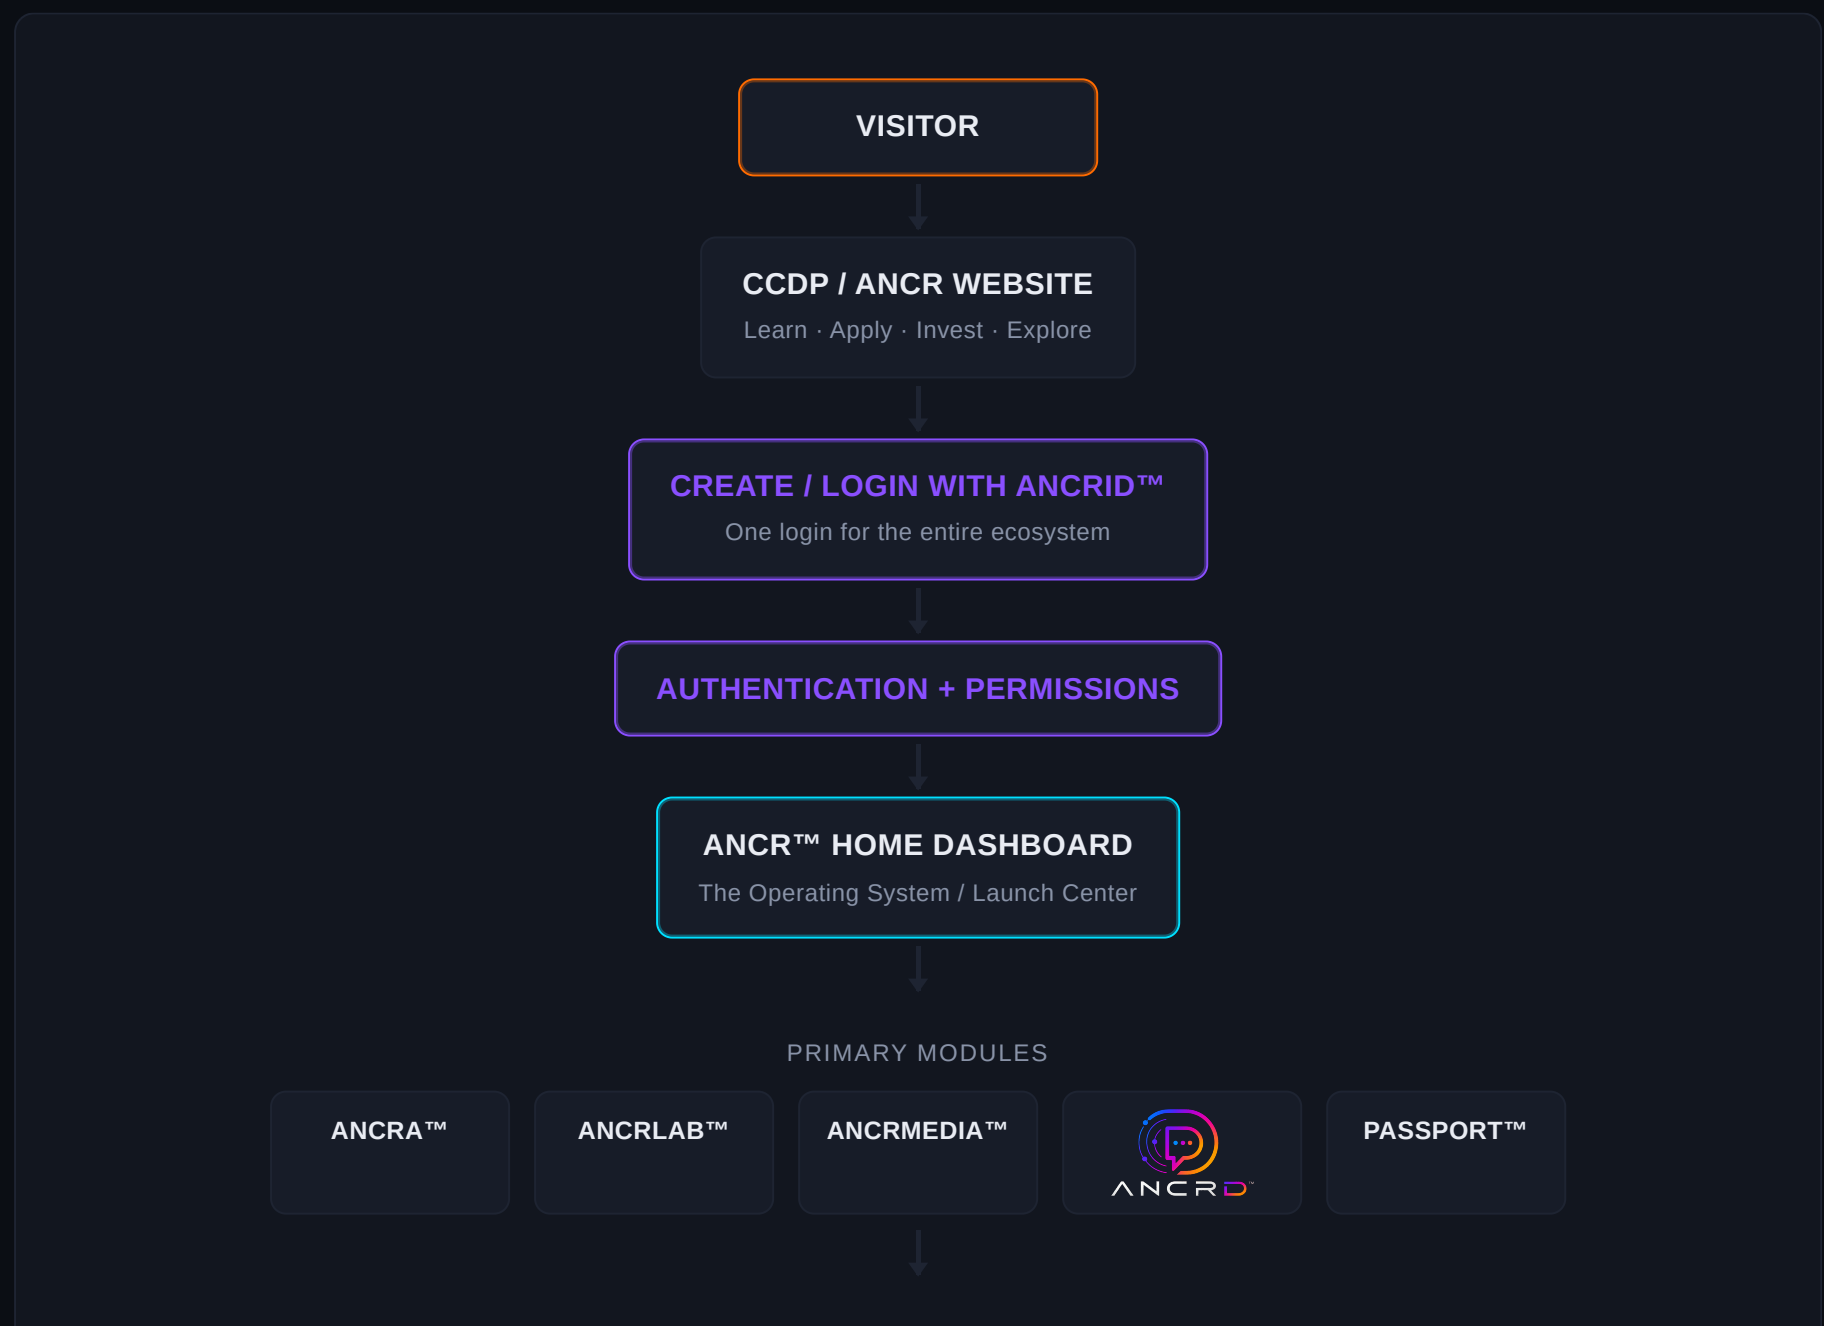

Prepared for: Tech Team **System:** ANCR™ Ecosystem (identity layer: ANCRID™) **Doc type:** Master Flow Specification

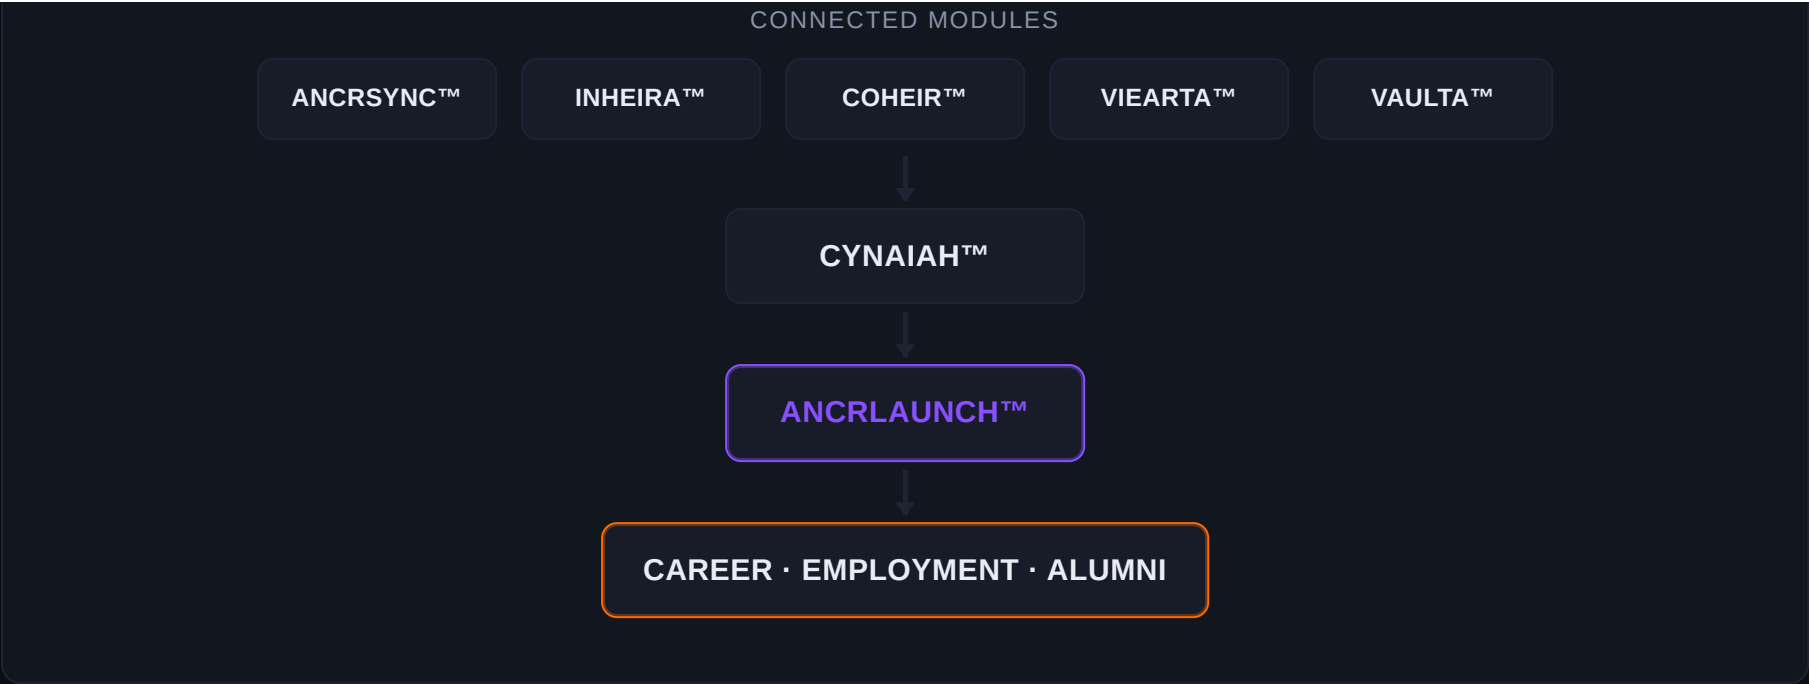

PRINCIPLE

ANCRID™ is the identity layer for the entire ANCR™ ecosystem — not just ANCRD™. One authentication, one session, one identity, with seamless navigation between modules. This Master Ecosystem Flow is the first engineering diagram in the documentation set: every module-level flow (ANCRA™, ANCRD™, INHEIRA™, VIEARTA™, COHEIR™, Vaulta™, CYNIAH™, and the rest) is a child flow beneath it.

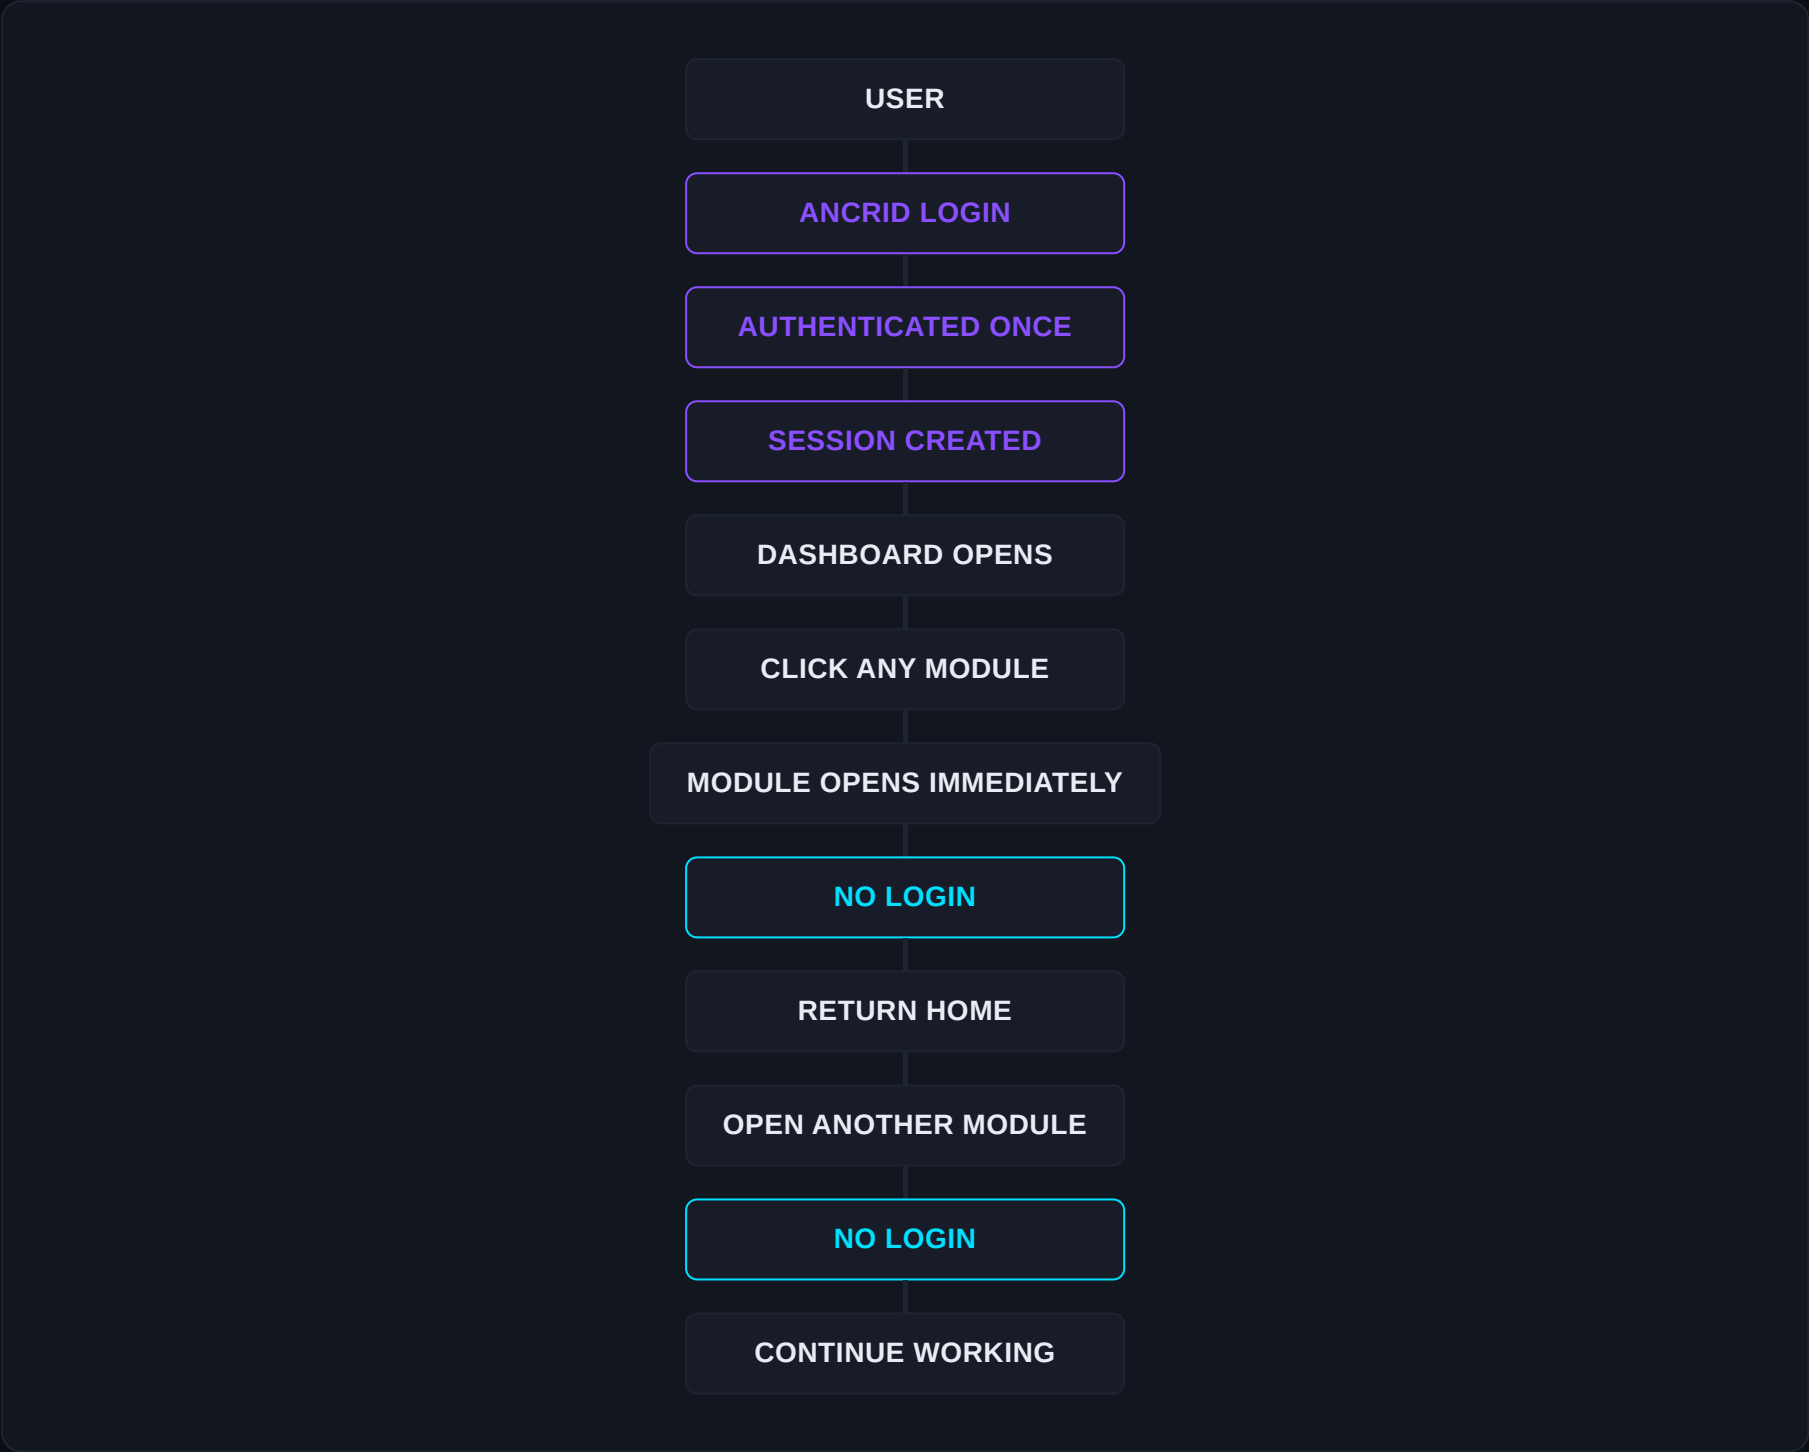

From the ANCRD™ Product Specification: "ANCRD uses ANCRID exclusively. No independent login. All permissions are inherited from ANCRID." This document extends that principle to the full ecosystem.

ANCR™ ECOSYSTEM MASTER FLOW

SINGLE SIGN-ON LOGIC

ENGINEERING PRINCIPLES

1. ANCRID™ is the only authentication layer.
2. Every application trusts ANCRID™.
3. Applications never re-authenticate the user unless the ANCRID™ session has expired.
4. Modules exchange identity and permissions through ANCRID™ rather than maintaining their own login systems — consistent with the ANCRD™ specification, where identity, authentication, permissions, and Creator Passport remain within ANCRID™ and other modules consume that information rather than duplicating it.

USER EXPERIENCE

1. Login once with **ANCRID**.
2. Arrive at the ANCR Home Dashboard.
3. Open ANCRA → **no login**.
4. Open INHEIRA → **no login**.
5. Open ANCRMEDIA → **no login**.
6. Open ANCRD → **no login**.
7. Open Vaulta → **no login**.
8. Open CYNIAAH → **no login**.
9. Open COHEIR → **no login**.
10. Return home and continue working.

The only time the user should ever authenticate again is if the ANCRID™ session has expired or they explicitly sign out.

DOCUMENTATION HIERARCHY

LEVEL	DOCUMENT
MASTER	ANCR™ Ecosystem Master Flow (this document) — the single blueprint for how the ecosystem functions before any module-level detail.
CHILD	ANCRA™ User Flow — learning operating system, dashboard, and connected ecosystem modules.
CHILD	ANCRD™ Product Specification — identity, authentication, permissions, Creator Passport.
CHILD	INHEIRA™, VIEARTA™, COHEIR™, Vaulta™, CYNIAAH™, ANCRSYNC™, ANCRLAB™, ANCRMEDIA™ — individual module flows, each inheriting session and permissions from ANCRID™.

MODULE MARKS ON FILE

Confirmed logo assets collected to date. Remaining modules (INHEIRA™, VIEARTA™, COHEIR™, Vaulta™, CYNIAAH™, ANCRSYNC™, ANCRLAB™, ANCRMEDIA™, ANCRLAUNCH™) still need marks on file.

Build note — Confirm session/token handoff mechanism between ANCRID™ and each module (e.g., shared session token, short-lived scoped JWT) so that "no login" holds true across domains/subdomains, and define the expiry and re-auth trigger consistently across all modules.

ONE IDENTITY. **ANCRID™**. EVERY MODULE IN THE ANCR™ ECOSYSTEM.
