**SECTION 1****EXECUTIVE SUMMARY**

ANCER Passport™ is a global creative-mobility and cultural-intelligence product within the ANCR™ ecosystem, operated by Awe Day Creative Arts, Inc. under the CCDP™ platform. It prepares and supports creatives who travel internationally to study, tour, perform, collaborate, produce, film, exhibit, teach, attend residencies, participate in exchanges, and conduct creative business.

Passport is delivered in two entry environments that share one core service layer, data model, security model, and intelligence layer: an embedded experience inside ANCRA for students, faculty, administrators, and institutional travel groups, and a commercial standalone experience for independent creatives and organizations outside CCDP and ANCRA. The educational experience is not a consumer application inserted into a school, and the commercial experience is not a school portal resold to the public.

Identity, authentication, and verification are owned by ANCRID, the ecosystem-wide single-sign-on layer. Passport consumes identity from ANCRID and owns travel readiness, cultural intelligence, global education, translation, music-system knowledge, destination discovery, international safety, trip support, global networking, and creative mobility. Global Music Compass is Passport's signature capability, helping creatives understand how the world hears, creates, rehearses, teaches, and communicates music without reducing every tradition to a Western scale comparison.

Current status. The application described here is a demonstration environment using fictional data. It is not production-ready simply because it renders and its demonstration APIs respond. Real ANCRID SSO, encryption, authoritative travel feeds, subscription billing, and real OCR are production requirements, not current capabilities.

SECTION 2**DOCUMENT PURPOSE**

This document is the formal engineering and product source of truth for ANCR Passport. It is a specification, not an application-building prompt, prototype, marketing presentation, or high-level summary. Its purpose is to allow engineering to assess and continue the existing codebase, preserve the approved Passport interface and workflows, prevent unapproved redesign, and clearly separate demonstration features from production requirements.

This document will:

- Define Passport as a standalone ANCR product that is also accessible from inside ANCRA.
- Separate ANCRID identity ownership from Passport functionality.
- Document every module, route, data model, and API family in the current build.
- Document Global Music Compass fully and reciprocally.
- Classify every security-sensitive feature and state its production requirements.

- Provide testable acceptance criteria and a product-readiness matrix.

SECTION 3

PRODUCT VISION

Passport exists so that a creative can understand a place, its people, its working practices, and its music before arriving, and can act responsibly once there. It treats cultural intelligence as a professional competency: not a set of tips, but a practiced ability to prepare for, communicate within, and respect a tradition and a working environment that is not one's own.

The vision is reciprocal by design. Passport does not position American or Western creatives as the default user and every other tradition as the subject to be explained. A musician trained in the United States can prepare for a session in India, the Middle East, West Africa, East Asia, Latin America, or Europe, and a musician trained outside the United States can prepare for American studio, stage, gospel, jazz, and creative-business practices, without either party's knowledge being treated as inferior or incorrect.

SECTION 4

PRODUCT PROMISE

Core promise. “Understand the world before you enter it, and navigate it responsibly once you arrive.”

The promise commits Passport to three things: preparation that is specific to a destination, a discipline, and a role; guidance that is respectful of cultural ownership, permission, and context; and support that continues on the ground through trip mode, safety tools, and translation. Passport never presents AI-generated legal, medical, immigration, or emergency information as authoritative fact, and it directs users to authoritative sources for anything that can change or carry consequence.

SECTION 5

SCOPE

This specification covers the ANCR Passport product surface, its modules, routes, data models, API families, AI and translation architecture, security and privacy posture, accessibility requirements, content governance, commercialization readiness, integration dependencies, and testing and acceptance criteria, for both the ANCRA-embedded and commercial-standalone experiences.

In Scope

- All Passport modules, routes, and navigation defined in Sections 10 through 16.
- Global Music Compass and its ten capability areas (Section 13).
- The existing prototype technical stack, data models, and API families (Sections 14, 15, 17).

- Security, privacy, accessibility, and content-governance requirements (Sections 18 through 20).
- Commercialization, integration, nonfunctional, testing, and deployment requirements (Sections 21 through 25).

SECTION 6

OUT-OF-SCOPE ITEMS

- **Identity authority.** ANCRID owns authentication, verification, and SSO. Passport does not define or duplicate it.
- **Other ANCR modules.** ANCRA, ANCRSYNC, INHEIRA, VAULTA, and others are integration dependencies, specified in their own documents.
- **Production billing.** Subscription tiers are documented; live billing is not implemented in the demonstration.
- **Authoritative data authorship.** Passport integrates authoritative travel, legal, and health sources; it does not author them.
- **Real emergency dispatch.** The demonstration never contacts real emergency services; production integrations are future work.

SECTION 7

PRODUCT POSITION WITHIN THE ANCR ECOSYSTEM

Passport is a business module in the ANCR ecosystem. It depends on the platform and shared services, consumes identity from ANCRID, and is reachable both from within ANCRA and as an independent product. It does not own identity, and it does not re-implement shared platform services.

SECTION 8

ANCRID AND ANCRA RELATIONSHIPS

ANCRID (Identity)

ANCRID is the universal identity, authentication, verification, and single-sign-on layer for the ANCR ecosystem, comparable in function to an Apple ID. Passport is not a section of ANCRID. Passport may receive identity, role, language, accessibility, institution, and verification information from ANCRID, and must not duplicate ANCRID's identity authority.

CONCERN	OWNER	PASSPORT BEHAVIOR
Authentication / SSO	ANCRID	Consumes session; never presents its own login in production.
Identity verification	ANCRID	Reads verification state; does not re-verify.
Role & institution	ANCRID	Receives role and institution to scope access.
Language & accessibility	ANCRID	Receives preferences to personalize experience.
Travel & cultural data	ANCR Passport	Owns and manages all Passport-domain data.

ANCRA (Embedded Education)

ANCRA is the learning environment from which the embedded Passport experience is launched. Passport returns student progress, readiness, badges, and certificates to ANCRA, and honors faculty assignments and institutional group structures. Passport remains technically and commercially capable of operating as a standalone product independent of ANCRA.

SECTION 9

DUAL EDUCATIONAL AND COMMERCIAL ACCESS MODEL

Passport is delivered through two entry environments that share the same core services, data structures, security model, and intelligence layer.

1. ANCRA Embedded Experience

For students, faculty, administrators, and institutional travel groups: ANCRID single sign-on, seamless access from ANCRA, assigned cultural-intelligence lessons, global-readiness coursework, faculty assignments, study-abroad preparation, residencies and exchanges, institutional group travel, readiness tracking, badges and certificates, student progress returned to ANCRA, and role-based educational access.

2. Commercial Standalone Experience

For independent creatives and organizations outside CCDP and ANCRA: independent creatives, musicians, touring artists, filmmakers, dancers, fashion professionals, visual artists, content creators, music directors, producers, artist and tour managers, production teams, record labels, creative agencies, schools and universities, arts organizations, festivals, and film and media companies. Commercial users access Passport through an ANCRID account and an appropriate individual, professional, team, or institutional subscription.

Experience integrity. The educational experience must not feel like a consumer application awkwardly inserted into a school, and the commercial experience must not feel like a school portal resold to the public. Both draw from one shared core.

SECTION 10

USER ROLES AND PERMISSIONS

Roles are provided by ANCRID and scope what a user can see and do inside Passport. The demonstration supports role switching; production enforces role-based access control against the ANCRID session.

ROLE	CONTEXT	KEY PERMISSIONS
Individual Creative	Commercial	Full personal Passport: trips, readiness, translation, journal, network.
Professional / Creative Pro	Commercial	Individual plus advanced translation, Global Music Compass depth, saved projects.
Team / Tour Manager	Commercial	Manage team trips, rosters, group check-ins, shared documents.
Student	Educational	Assigned lessons, readiness coursework, personal trips within institution scope.
Faculty	Educational	Create assignments, assign country studies, track completion, review readiness.
Program Administrator	Educational	Manage rosters, announcements, orientation, exchanges, institution boundaries.
Group Manager	Both	Manage a defined travel group and its membership and check-ins.
Governance Reviewer	Both	Practitioner/scholar content review; cultural-sensitivity classification.

SECTION 11

PRIMARY USER JOURNEYS

J1 — Independent musician preparing a collaboration abroad

A commercial user signs in through ANCRID, selects a destination, opens the destination guide and readiness checklist adapted to the musician discipline, completes Culture School and Global Music Compass preparation, builds a trip, and switches to Trip Mode on the ground with translation, currency, cultural reminders, and safety tools.

J2 — Faculty assigning study-abroad preparation

A faculty member creates an assignment in Global Classroom, assigns a country study and readiness coursework to a student group, tracks completion and readiness, identifies missing requirements, and schedules orientation. Student progress and badges are returned to ANCRA.

J3 — Reciprocal preparation

An Indian or Middle Eastern musician prepares for an American recording session using Global Music Compass, learning American studio, rehearsal, and creative-business practices with the same depth and respect afforded to any other tradition.

SECTION 12

FUNCTIONAL REQUIREMENTS

Passport comprises twenty-two modules. Each requirement below is expressed as a capability the module must provide. Requirement identifiers use the module prefix (for example, HD for Home Dashboard) and are referenced in the Traceability Matrix (Section 29).

12.1 Home Dashboard

The home dashboard must include a personalized greeting, destination search, featured global creative, upcoming journey, readiness score, required actions, cultural preparation, language preparation, health and safety preparation, professional readiness, Continue Learning, translation shortcuts, cultural insight, demonstration travel alerts, saved destinations, recent journal entries, network recommendations, and notifications.

Sample journey (demonstration). Tokyo, Japan · International Music Collaboration · October 18–27, 2026 · Demonstration readiness 72%.

12.2 Explore the World & 12.3 Destination Guide

Initial demonstration destinations are Japan, Ghana, France, Brazil, South Korea, and the United Kingdom. Japan serves as the complete destination reference. Each destination guide must support the full field set below.

GROUP	FIELDS
Overview	Overview, major cities, languages, currency, time zones, weather overview, transportation.
Customs & Etiquette	Local customs, greetings, dining etiquette, clothing, religious and social awareness, tipping, photography and filming expectations.
Creative Industry	Local music and creative industries, performance and venue etiquette, business customs.
Legal & Conduct	Laws creatives should understand, restricted conduct, equipment and customs, instrument transportation, merchandise considerations.
Safety & Access	Emergency numbers, embassy/consular resources, accessibility, safety, LGBTQ+ legal and cultural considerations.
Actions	Save destination, add to trip, begin readiness lesson.

Verification notice (required). Every legal, visa, health, safety, emergency, and governmental section must display a notice that conditions may change and that users must confirm current information through the appropriate authoritative source.

12.4 Culture School

Culture School must include cultural intelligence, codes of ethics, professional conduct, business etiquette, religious and social awareness, respectful communication, international audience engagement, working with local creative teams, cultural appreciation versus appropriation, representing an organization abroad, international rights awareness, and international safety and responsibility. Required demonstration courses: Creative Collaboration in Japan; Cultural Appreciation vs. Appropriation. Courses support lessons, scenario-based learning, knowledge checks, feedback, progress tracking, certificates, and country-readiness badges.

12.5-12.7 Translators

Four translator modes are provided: Conversation, Camera, Creative Language, and Music and Lyric Translation.

MODE	REQUIREMENTS
Conversation	Source/destination languages, text entry, simulated or live voice input, translated text, pronunciation, text-to-speech, saved phrases, translation history.
Camera	Image upload or camera capture, OCR-ready architecture, extracted-text display, translation output, demonstration labeling until real OCR is connected.
Creative Language	Music, film, dance, fashion, theatre, production, rehearsal, creative business, rights and credits, stage and studio vocabulary.
Music & Lyric	Literal translation, cultural interpretation, performance-ready adaptation, idiom/metaphor/slang and cultural-reference explanation, sensitivity flags, approximate syllable count, pronunciation, project saving, fluent-speaker and cultural-review notice.

12.8 Travel Ready

Travel Ready covers passport, visa and work authorization, health and insurance, emergency planning, contracts and invitation letters, equipment and customs, accessibility, budget and currency, phone and connectivity, electrical requirements, packing, cultural preparation, language preparation, and professional conduct. Checklists are discipline-adaptive across musician, filmmaker, dancer, visual artist, fashion professional, theatre professional, content creator, educator, and creative executive, with completion status, due dates, reminders, document links, urgency levels, required and recommended items, completion percentage, and a printable summary.

12.9-12.12 Trips & Trip Mode

My Trips supports individual, institutional, and team trips with destination, dates, purpose, readiness, status, and group membership. Trip Detail includes overview, itinerary, preparation,

documents, culture, language, team, expenses, and emergency. Trip Mode is mobile-first and supports current destination, local and home time, today's itinerary, next event, venue details, essential phrases, live translator, currency conversion, transportation, cultural reminders, emergency number, embassy/consular information, offline documents, safe check-in, and an I Need Help experience.

Emergency simulation. The I Need Help experience covers medical emergency, lost passport, legal support, harassment or discrimination, missing team member, group-leader contact, emergency-contact access, and embassy/consular support. The demonstration must clearly state that it does not contact real emergency services.

12.13 Safety and Support

Safety includes an emergency plan, destination emergency numbers, trusted contacts, embassy and consular resources, lost-document guidance, medical- and legal-support guidance, harassment and discrimination support, disaster guidance, group check-ins, protected emergency documents, and permission-based location sharing.

Location sharing. Location sharing must always be optional, consent-based, visible, limited by role and purpose, revocable, logged, and disabled by default unless intentionally enabled.

12.14 Global Classroom

Global Classroom supports Student, Faculty, Program Administrator, Group Manager, and Tour Manager roles. Faculty and administrators can create assignments, assign country studies, track completion, review readiness, manage group rosters, send announcements, identify missing requirements, schedule orientation, and create international exchanges. Required demonstration assignment: “Prepare for a Creative Residency in Ghana,” including cultural research, professional conduct, creative-industry overview, language preparation, travel checklist, and reflection.

12.15-12.16 My Passport & Travel Documents

My Passport includes profile, ANCRID reference, creative discipline, home country, citizenship, preferred language, languages spoken, accessibility preferences, emergency contacts, passport-expiration status, visa records, international experiences, badges, completed courses, saved destinations, travel documents, and global-readiness score.

Sensitive-field masking. Sensitive values must be masked by default. Full passport numbers must not appear on general screens.

12.17-12.19 Readiness, Journal, Network

Global Readiness aggregates a readiness score across cultural, language, health/safety, and professional dimensions. Travel Journal supports create, edit, delete, title, body, date, location,

mood, trip association, private-by-default status, export readiness, and permission-controlled sharing in future versions. Global Network supports discovery of musicians, creatives, music stores, creative businesses, shows, performances, showcases, festivals, and events, with search, filter by type and location, connection request, connected state, verification badge, saved listing, and destination/trip association. Seeded demonstration listings must be clearly distinguished from verified live information.

12.20-12.22 Notifications, Settings, Administration

Notifications surfaces demonstration alerts and system messages. Settings covers profile, documents, readiness, and account controls. Administration and Content Governance provides the practitioner/scholar review workflow, cultural-sensitivity classification, source and verification metadata, and institutional access boundaries described in Section 20.

SECTION 13

GLOBAL MUSIC COMPASS REQUIREMENTS

Global Music Compass is Passport's signature capability. It helps creatives understand how the world hears, creates, rehearses, teaches, organizes, and communicates music. It must not reduce every musical tradition to a Western scale comparison, and it must treat traditions reciprocally rather than positioning Western or American music as the universal default.

Ten Capability Areas

#	AREA	FUNCTION
1	Music Systems Atlas	Interactive learning atlas of specific traditions, communities, styles, and contexts.
2	Musical-System Comparison	Compare two traditions without asserting exact equivalence; show where comparison breaks down.
3	Music Session Translator	Multilingual rehearsal and studio phrases with music-specific meaning and cultural context.
4	Scale/Mode/Raga/Maqam Reference	Interactive reference across frameworks with pitch maps, movement, and ornamentation.
5	Rhythm and Time Lab	Layered rhythm reference: pulse, meter, cycle, clave, tala, groove, cue-based transitions.
6	Instruments and Ensembles	Instrument and ensemble profiles with roles, technique, and handling etiquette.
7	Global Rehearsal Mode	Preparation pathway for a specific international session or residency.
8	Musical Knowledge Translator	Translate a musical idea across systems with differences and verification flags.
9	Global Music Classroom	Connect Compass to Culture School and ANCRA for assignments and tracking.

#	AREA	FUNCTION
10	Reciprocal Demonstration Pathways	Prebuilt preparation pathways in both directions.

Initial Musical Traditions

Western tonal systems, American gospel, American jazz, Hindustani classical music, Carnatic classical music, Arabic maqam traditions, West African traditions, Afro-Cuban traditions, and Japanese traditions. The structure is designed for future expansion, and no single system is treated as representative of an entire country, ethnicity, religion, or region.

Music-Tradition Record Fields

GROUP	FIELDS
Context	Cultural and historical context; community and geographic context.
Pitch	Pitch organization, tuning, tonal center, modes/scales/ragas/maqamat/makams, characteristic movement, pitch relationships, microtonal or flexible-pitch considerations, ornamentation, melodic development, improvisation.
Time	Rhythm, meter, cyclical time, groove, form, call and response.
Ensemble	Ensemble roles, leadership and cueing, notation, oral transmission, instruments, vocal practices, rehearsal etiquette, performance context.
Meaning	Spiritual, ceremonial, and social meaning; cultural permissions.
Resources	Recommended listening, glossary, sources.
Governance	Practitioner review, scholar review, review date, audio rights, permission level, cultural-sensitivity classification.

Required Distinctions & Pathways

Every Compass answer must distinguish direct reference, approximate comparison, important differences, cultural context, rehearsal recommendation, and practitioner-verification required. Three demonstration pathways are required and must be reciprocal: a United States musician preparing for collaboration in India; a United States musician preparing for collaboration in the Middle East; and an Indian or Middle Eastern musician preparing for a United States recording session.

Cultural stewardship. Global Music Compass supports preparation and respectful collaboration. It does not replace learning directly from musicians, culture-bearers, educators, and communities connected to the tradition. Sacred, ceremonial, community-owned, or restricted music is never treated as freely available, and generated or placeholder audio is clearly labeled until reviewed audio is available.

SECTION 14

DATA ARCHITECTURE

Passport data is stored in MongoDB and seeded with demonstration data on startup. The models below are the canonical Passport data domains. Each is specified by purpose, identifier, key fields, relationships, ownership, privacy classification, and audit considerations. Privacy classes are: Public, Internal, Sensitive, and Restricted (identity/emergency/health).

MODEL	PURPOSE	KEY FIELDS	PRIVACY
User	Passport-side user record linked to ANCRID	id, ancrd_ref, role, discipline, home_country, languages	Sensitive
ANCRIDProfileReference	Read-only reference to ANCRID identity	ancrd_ref, verification_state, institution, role	Restricted
Destination	Country/region discovery record	id, country, cities, languages, currency, timezones	Public
CountryGuide	Full destination guidance	destination_id, sections[], legal_notice, verification[]	Public/Internal
CulturalLesson	A Culture School lesson	id, course_id, type, content, knowledge_check	Public
Course	A Culture School course	id, title, lessons[], certificate, badge	Public
CourseProgress	Per-user course progress	user_id, course_id, completed_lessons[], status	Internal
ReadinessBadge	Earned country-readiness badge	user_id, country, level, earned_at	Internal
Translation	A translation record/history entry	id, user_id, mode, source, target, output	Internal
SavedPhrase	A user-saved phrase	id, user_id, source, translation, context	Internal
Trip	A planned trip	id, owner_id, type, destination, dates, purpose, status	Sensitive
ItineraryItem	A trip itinerary entry	id, trip_id, time, title, venue, notes	Internal
TravelChecklist	Discipline-adaptive checklist	id, trip_id, discipline, items[], percent	Internal
ChecklistItem	A checklist entry	id, checklist_id, label, required, status, due	Internal
TravelDocument	A stored travel document reference	id, user_id, type, masked_value, expiry	Restricted
EmergencyContact	A user emergency contact	id, user_id, name, relation, phone	Restricted
Group	A travel group	id, name, type, institution, manager_id	Internal
GroupMember	Group membership	group_id, user_id, role, status	Internal

MODEL	PURPOSE	KEY FIELDS	PRIVACY
Assignment	A classroom assignment	id, faculty_id, group_id, country, tasks[], due	Internal
JournalEntry	A private journal entry	id, user_id, title, body, mood, trip_id, private	Sensitive
Network	A network listing	id, type, name, location, verified	Public
Connection	A connection between users/listings	id, user_id, target_id, state	Internal
Notification	A user notification	id, user_id, type, message, read	Internal
MusicTradition	A Global Music Compass tradition record	id, tradition, community, region, fields[], governance	Public/Internal
Rhythm	A rhythm/time record	id, tradition_id, cycle, layers[], notation	Public
Instrument	An instrument/ensemble profile	id, tradition_id, name, local_name, role, etiquette	Public
DemoPathway	A reciprocal demonstration pathway	id, direction, steps[], listening[], checklist[]	Public
AccessTier	A subscription tier definition	id, name, scope, seats, features[]	Internal

Ownership boundary. Passport owns all models above except ANCRIDProfileReference, which is a read-only projection of ANCRID-owned identity. No Passport model duplicates ANCRID identity authority, consistent with TA-003.

SECTION 15

API SPECIFICATION

All backend routes are prefixed with /api and the frontend addresses them through REACT_APP_BACKEND_URL. Every endpoint below is documented with method, purpose, authentication requirement, allowed roles, and demonstration or production status. Unless noted, endpoints require an authenticated session (demonstration: simulated user; production: ANCRID SSO) and return JSON. Standard error conditions are 400 (validation), 401/403 (auth/role), 404 (not found), 429 (rate limit), and 503/504 (upstream/LLM timeout with graceful handling).

15.1 Core

ENDPOINT	PURPOSE	AUTH / STATUS
GET /api/me	Current user identity and profile	Auth · Demo
PUT /api/me/role	Switch role (demonstration)	Auth · Demo only
GET /api/dashboard	Home dashboard aggregate	Auth · Demo

15.2 Destinations

ENDPOINT	PURPOSE	AUTH / STATUS
GET /api/destinations	List destinations	Auth · Demo
GET /api/destinations/{id}	Destination guide detail	Auth · Demo
POST /api/destinations/{id}/save	Save a destination	Auth · Demo
GET /api/saved-destinations	List saved destinations	Auth · Demo

15.3 Culture School

ENDPOINT	PURPOSE	AUTH / STATUS
GET /api/courses	List courses	Auth · Demo
GET /api/courses/{id}	Course detail	Auth · Demo
POST /api/courses/{id}/complete-lesson	Mark lesson complete	Auth · Demo

15.4 Translator

ENDPOINT	PURPOSE	AUTH / STATUS
POST /api/translate	Translate text/conversation	Auth · Demo (AI)
POST /api/translate/lyrics	Lyric/music translation	Auth · Demo (AI)
GET /api/phrases	List saved phrases	Auth · Demo
POST /api/phrases	Save a phrase	Auth · Demo
DELETE /api/phrases/{id}	Delete a saved phrase	Auth · Demo
GET /api/creative-phrases	Creative-language phrase set	Auth · Demo

15.5 Travel Ready

ENDPOINT	PURPOSE	AUTH / STATUS
GET /api/checklist	Discipline-adaptive checklist	Auth · Demo
PATCH /api/checklist/{id}	Update a checklist item	Auth · Demo

15.6 Trips

ENDPOINT	PURPOSE	AUTH / STATUS
GET /api/trips	List trips	Auth · Demo
GET /api/trips/{id}	Trip detail	Auth · Demo
GET /api/trip-mode	Trip Mode on-the-ground data	Auth · Demo

15.7 Safety

ENDPOINT	PURPOSE	AUTH / STATUS
GET /api/safety	Safety and support data	Auth · Demo
PUT /api/safety/location-sharing	Set location-sharing consent	Auth · Demo (consent)

15.8 Network

ENDPOINT	PURPOSE	AUTH / STATUS
GET /api/network	List network listings	Auth · Demo
POST /api/network/{id}/connect	Send connection request	Auth · Demo

15.9 Journal

ENDPOINT	PURPOSE	AUTH / STATUS
GET /api/journal	List journal entries	Auth · Demo (private)
POST /api/journal	Create journal entry	Auth · Demo (private)
DELETE /api/journal/{id}	Delete journal entry	Auth · Demo (private)

15.10 Passport / Classroom / Notifications

ENDPOINT	PURPOSE	AUTH / STATUS
GET /api/passport	My Passport aggregate	Auth · Demo (masked)
GET /api/classroom	Classroom overview	Faculty/Admin · Demo
POST /api/classroom/assignments	Create assignment	Faculty/Admin · Demo
GET /api/notifications	List notifications	Auth · Demo

15.11 Global Music Compass

ENDPOINT	PURPOSE	AUTH / STATUS
GET /api/music/overview	Compass overview	Auth · Demo
GET /api/music/traditions	List traditions	Auth · Demo
GET /api/music/traditions/{id}	Tradition detail record	Auth · Demo
GET /api/music/comparisons	Prebuilt comparisons	Auth · Demo
GET /api/music/session-phrases	Session phrase set	Auth · Demo
GET /api/music/rhythms	Rhythm/time records	Auth · Demo
GET /api/music/instruments	Instrument/ensemble profiles	Auth · Demo
GET /api/music/classroom	Music classroom data	Faculty/Admin · Demo
GET /api/music/pathways/{id}	Demonstration pathway	Auth · Demo
POST /api/music/compare	Compare two systems	Auth · Demo (AI)
POST /api/music/session-translate	Session translation	Auth · Demo (AI)
POST /api/music/rehearsal-plan	Generate rehearsal plan	Auth · Demo (AI)
POST /api/music/knowledge-translate	Translate a musical idea	Auth · Demo (AI)

SECTION 16

APPLICATION NAVIGATION AND ROUTING

Passport uses the ecosystem navigation conventions of TA-002. Primary navigation and profile/account areas map to the frontend routes below.

NAV ITEM	ROUTE	MODULE
Home	/	Home Dashboard
Explore	/explore, /explore/:id	Explore / Destination Guide
Culture School	/culture-school, /culture-school/:id	Culture School
Translator	/translator	Translator (4 modes)
Global Music Compass	/music-compass	Global Music Compass
Travel Ready	/travel-ready	Travel Ready
My Trips	/trips, /trips/:id	My Trips / Trip Detail
Trip Mode	/trip-mode	Trip Mode

NAV ITEM	ROUTE	MODULE
Safety	/safety	Safety and Support
Global Classroom	/global-classroom	Global Classroom
Network	/network	Global Network
Journal	/journal	Travel Journal
My Passport	/passport	My Passport
Documents	/documents	Travel Documents
Readiness	/readiness	Global Readiness
Settings	/settings	Settings

Profile and account areas are My Profile, Documents, Readiness, Settings, and Sign Out. In the demonstration a simulated ANCRID user is automatically authenticated and no login screen is presented; production replaces this with ANCRID SSO.

Demonstration user. Name: Maya Thompson. Authentication state: automatically authenticated demonstration user. Login screen: not required in the prototype. Purpose: demonstrate ANCRID identity and Passport continuity. Restriction: this simulation must be replaced by production ANCRID SSO before real-user launch.

SECTION 17

AI AND TRANSLATION ARCHITECTURE

AI powers translation, lyric translation, musical comparison, session translation, rehearsal planning, and musical-knowledge translation. The current build integrates an Emergent LLM (Claude Sonnet model through emergentintegrations). The AI provider and model must be configurable so engineering can change providers or models without redesigning Passport; the exact current model identifier is not a permanent architectural requirement.

Resilience

- Axios API client with a twelve-second request timeout where applicable.
- Retry on timeouts and 5xx errors, maximum three retries, with backoff.
- LLM calls protected by timeout handling; graceful 503 and 504 responses.
- No unhandled gateway failures surfaced to the user.

Authoritative boundary. Passport must never present AI-generated legal, medical, immigration, or emergency information as authoritative fact. AI output in these areas is labeled and paired with a directive to consult an authoritative source.

SECTION 18

SECURITY, PRIVACY, AND DATA PROTECTION

Demonstration classification. The current application is a demonstration environment using fictional information. Real passports, visas, medical information, location histories, and emergency-contact data must not be uploaded until production security controls are implemented and independently verified.

Production Launch Requirements

AREA	REQUIREMENT
Identity	Real ANCRID SSO; role-based access control; session management; account recovery.
Encryption	Encryption in transit and at rest; protected secret management; encrypted document storage.
Sensitive Data	Sensitive-field masking; no full passport numbers on general screens.
Consent & Retention	Consent records; data-retention rules; data deletion; location-sharing consent; emergency-data permissions.
Tenancy	Institutional access boundaries; tenant separation.
Assurance	Audit logs; incident-response plan; backup and recovery; vulnerability, penetration, and dependency testing.
Agreements	Privacy-policy and terms acceptance.

SECTION 19

ACCESSIBILITY

Passport targets WCAG 2.2 AA alignment. Accessibility is a build requirement evaluated alongside functional QA, consistent with TA-005.

- Keyboard navigation, visible focus, and screen-reader labeling.
- Accessible contrast, adjustable text, and reduced-motion support.
- Captions and transcripts; translation accessibility.
- Mobile touch targets, clear error messages, accessible forms, and ARIA labels.
- Test identifiers on interactive elements to support automated accessibility testing.

SECTION 20

AUTHORITATIVE INFORMATION AND CONTENT GOVERNANCE

Production Passport connects to reviewed or authoritative sources for visa requirements, entry requirements, travel advisories, local laws, emergency numbers, embassy and consular information, health guidance, transportation information, currency rates, weather, events and venues, and business listings.

Required Provenance Fields

Every externally sourced record must carry: source, source URL, last retrieved, last verified, jurisdiction, expiration or refresh interval, disclaimer, and confidence or verification state. Passport never presents AI-generated legal, medical, immigration, or emergency information as authoritative fact.

Cultural Content Governance

Global Music Compass and cultural content are designed for practitioner and scholar review. Governance fields include tradition, community, region, practitioner reviewer, scholar reviewer, review date, source, audio rights, cultural sensitivity, permission level, access class (public, educational, restricted, or community-controlled), and last verified date. Sacred, ceremonial, community-owned, or restricted music is never treated as freely available.

SECTION 21

COMMERCIALIZATION AND SUBSCRIPTION READINESS

Passport is commercially capable as a standalone product. Access tiers are defined for future activation; billing is not active in the demonstration.

TIER	AUDIENCE	SCOPE
Passport Individual	Independent creatives	Personal travel readiness, translation, journal, network.
Passport Creative Pro	Professional creatives	Individual plus advanced translation and Global Music Compass depth.
Passport Team	Teams, tours, productions	Team trips, rosters, group check-ins, shared documents, seats.
Passport Institution	Schools, organizations	Institutional licensing, admin controls, tenant boundaries, ANCRA embedding.

Future billing must support subscription status, plan, organization, seats, renewal, cancellation, trial, invoices, payment-provider reference, institutional licensing, and administrative controls. Passport must not store full payment-card information; a payment provider holds card data by reference.

SECTION 22

INTEGRATION DEPENDENCIES

DEPENDENCY	PURPOSE	STATUS
ANCRID	Identity, SSO, verification	Production requirement
ANCRA	Embedded education, progress return	Production requirement
ANCRSYNC	Scheduling and coordination	Future
INHEIRA / VAULTA	Publishing and asset/rights custody	Future
VIEARTA / ANCRMEDIA / COHEIR	Visual, media, and collaboration surfaces	Future
Authoritative travel providers	Visa, advisory, legal, health, emergency data	Production requirement
Translation & OCR providers	Live translation and camera OCR	Production requirement
Payment provider	Subscription billing	Future
Maps / Weather / Currency	Location, weather, currency services	Future
Events & business directory	Live network listings	Future

SECTION 23

NONFUNCTIONAL REQUIREMENTS

ATTRIBUTE	REQUIREMENT
Performance	Interactive surfaces respond within defined budgets; AI calls bounded by a twelve-second timeout with graceful fallback.
Reliability	Retry with backoff on transient errors; no unhandled gateway failures; graceful 503/504.
Scalability	Data and services operate from seeded demonstration scale to production volume without redesign.
Availability	Trip Mode degrades gracefully and supports offline documents on the ground.
Maintainability	Configurable AI provider/model; /api routing convention; documented data models.
Portability	Standalone deployment independent of ANCRA; embeddable within ANCRA.
Observability	Production monitoring, logging, and audit per Sections 18 and 20.

SECTION 24

TESTING AND ACCEPTANCE CRITERIA

Acceptance criteria for every major module must distinguish visual completion, demonstration functionality, backend functionality, persistent data, AI response behavior, role permissions, mobile behavior, accessibility, privacy, security, and production readiness. Representative criteria follow.

MODULE	REPRESENTATIVE ACCEPTANCE CRITERIA
Home Dashboard	Renders personalized greeting, readiness score, required actions, and demonstration alerts for the simulated user.
Destination Guide	Japan renders the complete reference field set; every legal/health/safety section shows the verification notice.
Culture School	Both required courses load, track progress, and issue a certificate and country badge on completion.
Translator	All four modes return output; camera mode is labeled demonstration until real OCR is connected.
Global Music Compass	Ten areas load; three reciprocal pathways present; answers show the six required distinctions.
Trip Mode	Mobile-first layout works; I Need Help clearly states it does not contact real emergency services.
Safety	Location sharing is off by default, consent-based, revocable, and logged.
My Passport	Sensitive fields masked by default; full passport numbers never shown on general screens.

Product-Readiness Matrix

Each module is tracked against seven statuses: Designed, Demonstration Functional, Technically Connected, Production Hardened, Authority Verified, Approved for Real User Data, and Commercially Launchable. The current build is at Demonstration Functional to Technically Connected across most modules and is not production-ready.

MODULE	CURRENT STATUS
Home / Explore / Culture School	Demonstration Functional
Translator / Global Music Compass	Demonstration Functional (AI connected)
Trips / Trip Mode / Safety	Demonstration Functional
My Passport / Documents	Designed → Demonstration Functional (masked demo data)
Global Classroom / Network / Journal	Demonstration Functional

MODULE

CURRENT STATUS

**Security / Authoritative Feeds /
Billing / OCR**

Designed (production backlog)

Readiness discipline. The current prototype must not be labeled production-ready simply because it renders and its demonstration APIs respond.

SECTION 25

DEPLOYMENT AND ENVIRONMENT REQUIREMENTS

The prototype stack is a React frontend (Create React App, React Router, Framer Motion, Tailwind CSS, shadcn/ui, lucide-react, sonner, TanStack React Query) and a FastAPI backend (Motor async MongoDB driver, Pydantic) over MongoDB. Backend routes are prefixed with /api; the frontend addresses the backend through REACT_APP_BACKEND_URL. The database is configured through MONGO_URL and DB_NAME and is seeded with demonstration data on startup.

ENVIRONMENT	PURPOSE	NOTES
Development	Engineering and integration	Seeded demo data; simulated ANCRID user.
Staging	Pre-production validation	Production controls under test; no real user data.
Production	Real users	Requires ANCRID SSO, encryption, authoritative feeds, monitoring, security validation.

SECTION 26

DEMONSTRATION VERSUS PRODUCTION STATUS

Appropriate for Demonstration

Simulated ANCRID user, seeded fictional data, AI translation, AI musical comparison, sample destinations, trips, courses, and network listings, demonstration safety information, a simulated OCR interface, demonstration role switching, non-billing subscription tiers, and placeholder or generated musical audio labeled appropriately.

Requires Production Implementation

Real ANCRID SSO, encryption, secure document storage, real OCR, authoritative legal/visa/health/safety feeds, live emergency and consular data, live events and creative-business listings, maps and geolocation, subscription billing, practitioner and scholar review workflow, reviewed and licensed musical audio, institutional tenant separation, production monitoring, security validation, a formal accessibility audit, and mobile application packaging if approved.

SECTION 27

KNOWN BACKLOG AND FUTURE INTEGRATIONS

- Real ANCRID SSO, encryption, and secure document storage.
- Real OCR and authoritative legal, visa, health, and safety feeds.
- Live emergency and consular data; live events and creative-business listings.
- Maps and geolocation; subscription billing.
- Practitioner and scholar review workflow; reviewed and licensed musical audio.
- Institutional tenant separation; production monitoring; security validation; formal accessibility audit.
- Mobile application packaging if approved.

SECTION 28

RISKS AND MITIGATIONS

RISK	IMPACT	LIKELIHOOD	MITIGATION
Authoritative data drift	High	Medium	Provenance fields, refresh intervals, verification notices; never present AI as authoritative.
Cultural misrepresentation	High	Medium	Practitioner/scholar review; sensitivity classification; no exact-equivalence claims.
Identity duplication	High	Low	ANCRID owns identity; Passport consumes a read-only reference (TA-003).
Sensitive-data exposure	High	Low	Masking, encryption, tenant separation, consent, audit before real data.
Premature production label	Medium	Medium	Product-readiness matrix; explicit demonstration classification.
AI provider lock-in	Medium	Medium	Configurable provider/model; no permanent model identifier.

SECTION 29

TRACEABILITY MATRIX

The matrix maps requirement to module, role, API, data model, acceptance test, and status. A representative extract follows; the full matrix is maintained as a living annex.

REQ	MODULE	ROLE	API	DATA MODEL	STATUS
HD-01	Home Dashboard	All	GET /api/dashboard	User, Trip	Demo Functional
DG-01	Destination Guide	All	GET /api/destinations/{id}	CountryGuide	Demo Functional

REQ	MODULE	ROLE	API	DATA MODEL	STATUS
CS-01	Culture School	Student	POST /api/courses/{id}/complete-lesson	CourseProgress	Demo Functional
TR-04	Music & Lyric Translate	Pro	POST /api/translate/lyrics	Translation	Demo (AI)
GMC-02	System Comparison	All	POST /api/music/compare	MusicTradition	Demo (AI)
TM-05	Trip Mode Help	All	GET /api/trip-mode	Trip	Demo Functional
SF-02	Location Sharing	All	PUT /api/safety/location-sharing	User	Demo (consent)
MP-03	Passport Masking	All	GET /api/passport	TravelDocument	Designed → Demo

SECTION 30

GLOSSARY

ANCRID — the ecosystem identity, authentication, and SSO layer. ANCRA — the learning environment that embeds Passport for education. ANCR Passport — the global creative-mobility and cultural-intelligence product specified here. Global Music Compass — Passport's cross-cultural musical-knowledge capability. Readiness Score — an aggregate of cultural, language, health/safety, and professional preparation. Trip Mode — the mobile-first on-the-ground experience. Provenance Fields — source and verification metadata on externally sourced records. Access Tier — a subscription level. Demonstration Functional — a module that works on seeded data but is not production-hardened.

SECTION 31

APPENDICES

Appendix A — Module Index

Home Dashboard, Explore the World, Destination Guide, Culture School, Language Translator, Creative Language Translator, Music and Lyric Translator, Global Music Compass, Travel Ready, My Trips, Trip Detail, Trip Mode, Safety and Support, Global Classroom, My Passport, Travel Documents, Global Readiness, Travel Journal, Global Network, Notifications, Settings, and Administration and Content Governance.

Appendix B — Route Index

/, /explore, /explore/:id, /culture-school, /culture-school/:id, /translator, /music-compass, /travel-ready, /trips, /trips/:id, /trip-mode, /safety, /global-classroom, /network, /journal, /passport, /documents, /readiness, /settings.

Appendix C — Consistency Review

This release confirms that every application route is documented, every API family is documented, every data model is addressed, every user role is defined, every security-sensitive feature is classified, Global Music Compass is included, the educational and commercial access models are included, real SSO/encryption/authoritative feeds/billing/OCR appear as production

requirements, no invented branding appears, and no demonstration feature is labeled production-ready.
