1 EXECUTIVE SUMMARY

VIEARTA™ is the Creative Health, Wellness & Human Performance application inside the Contemporary Creative Development Program (CCDP), powered by the ANCR ecosystem. It helps student-creators learn sustainable wellness principles and apply them directly to the demands of creative practice, rehearsal, production, performance, travel, recovery, and long-term career development.

CORE PROMISE Live Well · Perform Well · Create Forever

VIEARTA is intentionally not a commercial fitness application, medical provider, therapy service, or competitive wellness platform. It is an educational and practical creator-support environment where learning, reflection, daily habits, performance preparation, and institutional resources are connected in one experience.

1.1 Product Outcomes

- Teach creators how physical health, emotional wellness, nourishment, movement, preparation, rest, and recovery affect sustainable creative practice.
- Turn wellness education into usable daily tools rather than static course content.
- Help students notice personal patterns without diagnosis, shame, ranking, or false claims of causation.
- Provide consent-controlled institutional support without exposing private student information.
- Create a clear integration boundary between VIEARTA applications and shared ANCR infrastructure.

1.2 Current Product Status

STANDALONE FEATURE SET	Complete
BACKEND TEST SUITE	144/144 passing
FRONTEND CRITICAL FLOWS	Passed
WELCOME TOUR AND VIEA UI	Screenshot smoke-tested
ANCR SSO	Documented handshake; activation pending
MEDIA OBJECT STORAGE	Future integration; URL-based media live
REPOSITORY	Private viearta-platform repository

Change Summary

FOUNDATION	Authentication, dashboard, check-ins, learning continuity, brand system
LIFESTYLE	Nutrition, macros, hydration, mindfulness, affirmations, movement, barcode lookup
PROGRAMS	My Wellness, Learning, Performance, Recovery, Wellness Circle, Support
OPERATIONS	Consent, staff/admin views, media library, playlists, join links
INTELLIGENCE	Viea AI assistant, safety routing, student welcome tour
CURRENT	144 backend tests passing; frontend critical flows and screenshot smoke tests verified

2 PRODUCT CONTEXT AND POSITIONING

AWE DAY CREATIVE ARTS	Parent nonprofit and mission anchor.
CCDP™	The educational solution and creative-development framework.
ANCR™	The shared technology infrastructure and creator-development operating system.
VIEARTA™	The creative health, wellness, recovery, and human-performance application inside CCDP.
SOVREIGN	The external market-facing ecosystem students may enter after the educational experience.

2.1 Target Creator Disciplines

- Vocalists and recording artists
 - Musicians and instrumentalists
 - Producers, engineers, and songwriters
- Dancers, actors, and stage performers
 - Filmmakers, editors, and content creators
 - Creative entrepreneurs and multidisciplinary creators

2.2 Product Principles

CREATOR-SPECIFIC	Every major workflow must reflect real creative demands, not generic wellness use cases.
------------------	--

EDUCATION + APPLICATION	Lessons launch real tools; practice and reflection can count toward participation credit.
PRIVATE BY DEFAULT	Wellness, nutrition, journal, and AI conversation data remain user-scoped unless explicitly shared.
NON-COMPETITIVE	No peer rankings, public streaks, single wellness scores, or body-based academic credit.
HUMAN ESCALATION	Urgent, clinical, crisis, or specialist needs route toward qualified human support.
BRAND FIDELITY	Only the official VIEARTA artwork and established palette may be used.

3 USERS, ROLES, AND PERMISSIONS

ROLE	PERMITTED ACCESS	PROHIBITED ACCESS
Student creator	Own check-ins, lifestyle data, learning, performance, recovery, circles, journal, media, Viea history, consent settings.	Other students' private data; staff aggregates; another user's AI history.
Program mentor	Reserved role for future consented views and circle facilitation.	Private data not specifically shared; unrestricted student browsing.
Program admin	Aggregated anonymized patterns, consent-shared reflections, support inbox, circle/media/playlist administration.	Private journals, unshared habits, meals, calorie totals, or AI conversations.
System admin	Configuration and technical operations subject to logging and least privilege.	Routine browsing of sensitive user content.
ANCR identity provider	Future SSO authentication and identity claims.	Direct access to private wellness records unless separately authorized.

3.1 Authentication

- JWT bearer authentication with a seven-day token lifetime in the current standalone build.
- bcrypt password hashing.
- Protected application routes and user-scoped API filtering.
- ANCR SSO handshake documented at `/api/auth/ancr/status`; activation is deferred to the central ANCR team.
- Secrets are environment-based and excluded from source control.

3.2 Consent Model

Three independent consent toggles are stored in `viearta_consent` and default to `false`:

- Share wellness patterns
- Share reflections
- Share habits

ENFORCEMENT Consent must be checked at the API layer, not merely hidden in the interface. Revocation must take effect on subsequent staff requests.

4 EXPERIENCE AND DESIGN SYSTEM

AESTHETIC	Cinematic, premium, dark glassmorphism with restrained ambient glow.
PRIMARY BACKGROUND	Deep black / charcoal.
ACCENTS	Teal, purple, rose, orange, and warm gold derived from the official identity.
TYPOGRAPHY	Cormorant Garamond for display; Outfit for interface text.
ICONS	Lucide React; no emoji used as interface icons.
MOTION	Fade-up entry, subtle hover glow, ambient background movement; reduced-motion support.
BRAND ASSET	<code>/app/frontend/public/brand/viearta-logo.png</code> through Logo variants full, mark, and header.
ACCESSIBILITY	Keyboard navigation, readable contrast, responsive layouts, labels, error states, and reduced-motion behavior.

4.1 UX Guardrails

- No white consumer-fitness aesthetic.
- No generated or replacement logos.
- No red shame states for missed goals.
- No fake media players.
- No “failed,” “lazy,” or punitive wellness language.
- No public calorie, weight, activity, or streak comparison.
- No claims that tracked behavior caused a health outcome.

5 FUNCTIONAL REQUIREMENTS

5.1 Home Dashboard — /

- Welcome header with first name, discipline, ANCRID, date, demo-state label, rotating message, and brand promise.
- Daily affirmation with curated rotation, favorite action, and private reflection.
- “How Are You Arriving?” quick check-in across Body, Mind, Energy, Creative Capacity, and Performance Readiness.
- Wellness snapshot for sleep, hydration, stress, discomfort, mood, voice/hearing condition, energy, and creative workload.
- Creative Demand selector for class, writing, studio, rehearsal, performance, audition, production, editing, travel, rest, and other.
- Rule-based recommendations derived from check-in, demand, and discipline.
- Seven-day pattern visualization, active learning, upcoming events/circles, and quick access.
- One-time three-step Welcome Tour with Back, Next, Skip, Finish, Escape, keyboard navigation, mobile layout, and persistent completion state.
- Floating Ask Viea launcher on authenticated routes except /login and /viea.

5.2 Daily Check-In — /check-in

Detailed daily entry persists to the checkins collection and supports body, mind, emotional state, energy, sleep, hydration, creative capacity, performance readiness, creative demand, and discipline-specific inputs. Submission returns supportive, non-diagnostic recommendations and links to relevant VIEARTA tools.

5.3 Lifestyle Hub — /lifestyle

Nutrition — /lifestyle/nutrition

- Daily calorie, protein, carbohydrate, fat, fiber, and hydration progress.
- Food library, user-created foods, gram-based scaling, meal types, notes, felt-after rating, saved meals, duplication, and copy-yesterday.
- Hydration quick logging at +250 ml, +350 ml, and +500 ml.
- Nutrition targets with manual configuration and a safe educational estimator.
- Estimator refusal for users under 18, pregnancy, eating-disorder history, and chronic conditions; no restrictive targets; 1,800 kcal floor in current implementation.
- Barcode scanning with rear-camera preference through ZXing, manual 6–14 digit input, Open Food Facts lookup, serving adjustment, live macro preview, recent scans, re-log, and deletion.
- Daily reflection on nourishment, energy steadiness, focus, and tomorrow's intention.

Mindfulness — /lifestyle/mindfulness

- 63 curated affirmations across 15 themes; daily deterministic rotation; favorites and private reflections.
- Ten guided practices with category filters, step guidance, real start/pause/resume/reset timers, completion logs, and optional reflection.
- No paid LLM is required for affirmation selection.

Movement — /lifestyle/movement

- Seventeen activities across creator-relevant mobility, conditioning, preparation, cooldown, studio, travel, and recovery categories.
- Rule-based Movement for Today selection using discipline, check-in, time, demand, and completion history.
- Real activity timer, perceived intensity, private note, quick logging, history, favorites, and personal routines.
- Safety stop for severe pain, injury, dizziness, chest pain, fainting, or breathing difficulty.

5.4 My Wellness — /wellness

- Habit creation, deletion, completion logging, 14-day history, and personal streak display.
- Private journal entries with date, mood tag, text, and deletion.
- Rhythms views for 7, 30, and 90 days.
- Observational pattern language that never claims causation or diagnosis.
- Three consent controls integrated into staff-facing access.

5.5 My Progress — /progress

Combines wellness, nutrition, hydration, mindfulness, movement, and creator-readiness data into personal charts and contextual copy. The system does not create a single wellness score or compare students.

5.6 Learning — /learning

VOCAL LONGEVITY	Sustainable vocal preparation, use, recovery, and help-seeking.
STUDIO HEALTH	Hearing, posture, screen, sitting, focus, and studio-demand awareness.
PERFORMANCE PREPARATION	Whole-person readiness for live, audition, rehearsal, and session demands.
CREATIVE RECOVERY	Rest, decompression, rejection recovery, creative-block reset, and sustainable return.

- Each pathway contains three lessons for a total of twelve.
- Each lesson includes written educational content, steps, reflection, and a linked VIEARTA tool.
- Participation credit requires both linked-tool launch and reflection submission.
- Academic completion never depends on weight, calories, macros, exercise minutes, body condition, or health outcome.

5.7 Performance — /performance

Four ritual templates — Show Day, Audition, Studio Session, and Rehearsal — chain mindfulness, movement, and affirmation activities in a timed stepper. Completion is logged. Custom ritual support is represented in the data model.

5.8 Recovery — /recovery

Five guided sessions — Post-Show, Tour, Studio, Dancer Recovery Day, and Creative Block Reset — provide timed, step-based recovery experiences and completion logging.

5.9 Wellness Circle — /circle and /circle/:id

- Four seeded circles with capacity enforcement and RSVP management.
- By-discipline attendance breakdown.
- Attendee first names visible only within the configured mutual-RSVP rule.
- Pre-gathering, general, and post-gathering discussion threads with moderation/deletion controls.
- Admin-configurable ANCRSYNC join URL with unsafe schemes rejected.
- Circle-scoped media playlist association.

5.10 Media Library and Playlists

- Administrators create, update, tag, associate, and delete URL-based YouTube, Vimeo, direct audio, and direct video records.
- Media may be associated with circles, lessons, movement activities, workshops, and playlists.
- Students browse curated playlists by category and open playlist details with ordered items.
- When approved media is unavailable, the system shows “Video coming from your VIEARTA team” rather than a fake player.
- Direct MP4/MP3 object-storage upload remains a future ANCR infrastructure integration.

5.11 Support and Resources — /support

- Eight configurable categories: program, mentor, nutrition, mental health, medical, accessibility, crisis, and disclaimer.
- Private support message form routed to the staff inbox.
- Clear emergency limitation: the form is not an emergency service.

- Viea safety footers link users to Support and urgent resources when applicable.

5.12 Staff/Admin — /admin and /admin/media

- Seven-day aggregate anonymized patterns and discipline breakdown.
- Consent-shared reflections only.
- No visibility into non-consenting students' private journals, meals, calories, macros, check-ins, or AI conversations.
- Media, playlist, circle join-link, support inbox, and applicable moderation operations.

6 VIEA AI ASSISTANT

Viea is VIEARTA's authenticated creator-wellness assistant. It provides general educational support, navigation, creator-specific reflection, and connection to VIEARTA tools. It is not a clinician, therapist, dietitian, emergency responder, or substitute for professional care.

6.1 Experience Requirements

- Full-page chat at /viea plus a floating Ask Viea launcher.
- Personalized system context using the authenticated student's first name, discipline, and ANCRID.
- Curated suggestion chips on empty state.
- Pending, sent, and failed message states; offline detection; inline retry; 4,000-character client limit.
- Optimistic-message reconciliation must not produce duplicates or orphaned messages.
- Conversation history is strictly user-scoped and can be cleared with confirmation.

6.2 Safety Requirements

CONDITION	REQUIRED SYSTEM BEHAVIOR
Self-harm or crisis language	Display client crisis banner; server appends 988/911 and urgent human-support guidance regardless of model output.
Medical or clinical nutrition request	Append Support/qualified-professional routing and avoid diagnosis or treatment.
Exercise warning signs	Stop activity guidance and route toward urgent/professional evaluation.
General wellness	Provide educational, non-prescriptive guidance linked to VIEARTA tools.
Privacy	Store history by user_id; do not expose student threads to admins.

6.3 Model Integration

The current implementation uses emergent integrations through LiteLLM and an environment-provided EMERGENT_LLM_KEY to access the configured Anthropic Claude model. The application must remain model-configurable, protect the key server-side, log failures without sensitive prompt leakage, and preserve server-side safety behavior even if the model response is incomplete or unsafe.

7 DATA ARCHITECTURE

USERS	Identity, role, creator profile, ANCRID, preferences, demo state.
CHECKINS	Daily body, mind, energy, creative capacity, performance readiness.
VIEARTA_MEALS	Dated meal records and computed nutrition totals.
VIEARTA_SAVED_MEALS	Reusable meal templates.
VIEARTA_CUSTOM_FOODS	User-created foods.
VIEARTA_HYDRATION	Dated water logs.
VIEARTA_TARGETS	Personal nutrition targets.
VIEARTA_NUTRITION_REFLECTIONS	Daily nutrition reflections.
VIEARTA_SCANS	Per-user barcode lookup history.
VIEARTA_MINDFULNESS_COMPLETIONS	Mindfulness completion records.
VIEARTA_MOVEMENT_COMPLETIONS	Movement completion records.
VIEARTA_AFFIRMATION_FAVORITES / REFLECTIONS	Saved affirmations and private reflections.
VIEARTA_HABITS / HABIT_LOGS	Habit definitions and completion history.
VIEARTA_JOURNAL	Private journal entries.
VIEARTA_LEARNING_CREDITS / LESSON_READS / LESSON_REFLECTIONS	Learning participation and credit gates.

VIEARTA_PERFORMANCE_COMPLETIONS / RITUALS_CUSTOM	Performance plans and completion.
VIEARTA_RECOVERY_COMPLETIONS	Recovery session completion.
VIEARTA_CIRCLE_RSVP S	Attendance and capacity records.
VIEARTA_CIRCLE_MESSAGES	Circle chat by thread.
VIEARTA_MEDIA / PLAYLISTS	Curated media records and ordered collections.
VIEARTA_CONSENT	Three privacy toggles.
VIEARTA_SUPPORT_MESSAGES	Student-to-staff support messages.
VIEARTA_VIEA_MESSAGES	Per-user AI history and safety flags.
VIEARTA_ROUTINES	Personal movement routines.

7.1 Data Rules

- All user-owned documents include user_id and are filtered server-side.
- Identifiers are string UUIDs unless an integration contract specifies otherwise.
- Check-ins are unique per user and date.
- Computed macro totals must reconcile from stored item quantities and per-unit data.
- Consent data defaults false when missing.
- Administrative aggregation must avoid exposing small-group or individually identifiable information.
- Sensitive records require a defined retention and deletion policy before institutional production deployment.

8 API SURFACE

All routes are prefixed /api. JWT bearer authentication is required except registration, login, and health. The following inventory reflects the implemented application contract.

Auth & Meta

POST	/api/auth/register
POST	/api/auth/login
POST	/api/auth/logout
GET	/api/auth/me
GET	/api/auth/ancr/status
GET	/api/ancr/status

Dashboard & Consent

GET	/api/summary
GET	/api/consent
PUT	/api/consent

Nutrition

GET	/api/lifestyle/foods
POST	/api/lifestyle/foods/custom
GET	/api/lifestyle/nutrition/scan/{barcode}
GET	/api/lifestyle/nutrition/scans/recent?limit
DELETE	/api/lifestyle/nutrition/scans/{barcode}
POST	/api/lifestyle/meals
GET	/api/lifestyle/meals?date=
DELETE	/api/lifestyle/meals/{meal_id}
POST	/api/lifestyle/meals/duplicate/{meal_id}
POST	/api/lifestyle/meals/copy-yesterday
POST	/api/lifestyle/saved-meals
GET	/api/lifestyle/saved-meals
DELETE	/api/lifestyle/saved-meals/{saved_id}
POST	/api/lifestyle/hydration

GET	/api/lifestyle/nutrition/today
POST	/api/lifestyle/nutrition/reflection
GET	/api/lifestyle/nutrition/reflection
GET	/api/lifestyle/targets
PUT	/api/lifestyle/targets
POST	/api/lifestyle/targets/estimate

Mindfulness, Movement & Affirmations

GET	/api/lifestyle/mindfulness/activities
POST	/api/lifestyle/mindfulness/complete
GET	/api/lifestyle/mindfulness/completions
GET	/api/lifestyle/movement/activities
GET	/api/lifestyle/movement/today
POST	/api/lifestyle/movement/complete
GET	/api/lifestyle/movement/completions
GET	/api/lifestyle/routines
POST	/api/lifestyle/routines
DELETE	/api/lifestyle/routines/{routine_id}
GET	/api/lifestyle/affirmations
GET	/api/lifestyle/affirmations/today
GET	/api/lifestyle/affirmations/favorites
POST	/api/lifestyle/affirmations/{aff_id}/favorite
POST	/api/lifestyle/affirmations/reflection

My Wellness

GET	/api/wellness/habits
POST	/api/wellness/habits

POST	/api/wellness/habits/log
DELETE	/api/wellness/habits/{habit_id}
GET	/api/wellness/journal
POST	/api/wellness/journal
DELETE	/api/wellness/journal/{entry_id}
GET	/api/wellness/rhythms

Learning, Performance & Recovery

GET	/api/learning/pathways
GET	/api/learning/pathways/{pathway_id}
GET	/api/learning/lessons/{lesson_id}
GET	/api/learning/current
GET	/api/learning/credits
POST	/api/learning/lessons/read
POST	/api/learning/lessons/launch
POST	/api/learning/lessons/reflect
GET	/api/performance/rituals
POST	/api/performance/rituals
POST	/api/performance/rituals/complete
GET	/api/recovery/sessions
POST	/api/recovery/sessions/complete

Circles

GET	/api/circles
GET	/api/circles/mine
GET	/api/circles/{circle_id}
POST	/api/circles/rsvp

PUT	/api/circles/{circle_id}/join-url
GET	/api/circles/{circle_id}/messages
POST	/api/circles/{circle_id}/messages
DELETE	/api/circles/messages/{message_id}

Media & Playlists

GET	/api/media
POST	/api/media
PUT	/api/media/{media_id}
DELETE	/api/media/{media_id}
GET	/api/media/for-circle/{circle_id}
GET	/api/media/for-lesson/{lesson_id}
GET	/api/media/for-movement/{activity_id}
GET	/api/media/workshops
GET	/api/media/playlists
POST	/api/media/playlists
PUT	/api/media/playlists/{id}
DELETE	/api/media/playlists/{id}
POST	/api/media/playlists/{id}/add
POST	/api/media/playlists/{id}/remove
GET	/api/media/playlists/{id}

Viea AI

GET	/api/viea/history
POST	/api/viea/message
DELETE	/api/viea/history

Support & Admin

GET	/api/support/resources
GET	/api/support/messages
POST	/api/support/messages
GET	/api/admin/aggregate
GET	/api/admin/students
GET	/api/admin/consented-reflections

9 INTEGRATIONS AND ANCR HANDOFFS

INTEGRATION	PURPOSE / AUTHENTICATION	STATUS
Configured Claude model via emergentintegrations	Viea conversational assistant · EMERGENT_LLM_KEY	Live
Open Food Facts	Barcode-to-nutrition lookup · Public API; no key	Live
ZXing browser libraries	Client-side barcode decoding · Not applicable	Live
ANCR SSO	Cross-application authentication · Handshake contract	Stubbed / future activation
ANCR Notifications	Cross-app reminders and alerts · ANCR infrastructure	Documented handoff
ANCRSYNC	Circle video-room launch · Validated join URL / future deeper integration	Partially integrated
Shared media/object storage	Direct MP4/MP3 uploads · ANCR infrastructure	Future

9.1 ANCR Boundary

/api/ancr/status documents the integration boundary for SSO, notifications, video rooms, and shared media storage. VIEARTA owns wellness workflows and domain data. ANCR owns shared identity and infrastructure services. Integration should preserve VIEARTA routes, privacy rules, and domain behavior rather than rebuilding the application.

10 SAFETY, PRIVACY, AND SECURITY

10.1 Wellness Safety

- Educational only; no diagnosis, prescription, treatment plan, or promise of outcome.
- Crisis language receives immediate emergency and human-support routing.

- Clinical nutrition and medical questions receive qualified-professional routing.
- Exercise warning signs stop the recommendation flow.
- Calorie and macro tools avoid restrictive defaults and body-based academic evaluation.
- Observed correlations are labeled as patterns, not causes.

10.2 Privacy

- Private by default.
- Explicit, granular, revocable consent.
- No admin access to Viea conversation history.
- No student access to another student's health or lifestyle data.
- Circle identity visibility is constrained by RSVP rules.
- Aggregates must be anonymized and protected against re-identification.

10.3 Application Security

- bcrypt password hashing and signed JWTs.
- Role-based endpoint authorization.
- Cross-user privacy tests for user-owned records.
- Unsafe circle URL schemes rejected, including javascript:, data:, vbscript:, and file:.
- LLM and database credentials stored only in environment variables.
- .env and credential files excluded from Git; safe .env.example files only.
- Production readiness requires rate limiting, brute-force protection, refresh-token strategy, centralized audit logging, dependency scanning, and institutional security review.

COMPLIANCE POSITION The application is designed for privacy-conscious educational use but must not claim HIPAA, FERPA, accessibility, medical-device, or other legal certification until formally assessed in its actual institutional deployment context.

11 TECHNICAL ARCHITECTURE

FRONTEND	React 19, react-router-dom v7, Tailwind CSS, Shadcn/UI, Recharts, Sonner, Lucide, Axios, ZXing.
BACKEND	FastAPI, Python, Motor async MongoDB client, Pydantic v2, PyJWT, bcrypt, httpx.
AI	emergentintegrations → LiteLLM → configured Anthropic Claude model.
DATABASE	MongoDB; database name supplied through DB_NAME.

PROCESS MANAGEMENT	supervisord for frontend, backend, and MongoDB in the current environment.
HOSTING TOPOLOGY	Containerized workload behind ingress; /api/* to backend :8001 and application routes to frontend :3000.
SOURCE REPOSITORY	Private viearta-platform GitHub repository.

11.1 Repository Structure

- /backend/server.py — authentication, dashboard, consent, admin, ANCR status.
- /backend/lifestyle.py — nutrition, barcode lookup, mindfulness, movement, affirmations.
- /backend/programs.py — learning, performance, recovery, circles, media, playlists, support.
- /backend/viea.py — AI assistant and deterministic safety net.
- /frontend/public/brand — official VIEARTA brand assets.
- /frontend/src/pages — routed application screens.
- /frontend/src/components/lifestyle — nutrition and activity components.
- /frontend/src/components/onboarding — Welcome Tour and Viea launcher.
- /frontend/src/context — authentication state.
- /frontend/src/lib/api.js — Axios client and JWT handling.

11.2 Environment Variables

VARIABLE	LOCATION	PURPOSE
REACT_APP_BACKEND_URL	frontend	Public API base URL.
WDS_SOCKET_PORT	frontend	Development hot-reload socket.
MONGO_URL	backend	MongoDB connection URI.
DB_NAME	backend	MongoDB database name.
JWT_SECRET	backend	JWT signing secret.
EMERGENT_LLM_KEY	backend	Server-side key for the configured LLM integration.

No live values or credentials are included in this specification. Demo and administrative access information must be shared through a secure channel and rotated before external deployment.

12 TESTING AND QUALITY ASSURANCE

BACKEND	144/144 tests passing across authentication, user isolation, lifestyle, programs, consent, media, circles, admin, barcode, and Viea APIs.
FRONTEND CRITICAL FLOWS	Login, protected routes, dashboard, check-ins, nutrition, macros, barcode, mindfulness, movement, learning, performance, recovery, circles, playlists, admin, support, and progress.
WELCOME TOUR	Desktop and mobile screenshots; first-login persistence; navigation and completion behavior.
VIEA	Send/receive, optimistic state, retry, offline state, crisis handling, conversation history, and launcher behavior.
SECURITY REGRESSION	JWT 401 enforcement, cross-user privacy, consent gating, and unsafe URL rejection.
ARTIFACTS	/app/test_reports/iteration_1.json through iteration_9.json.

12.1 Release Gate

- All automated backend tests pass.
- Critical frontend workflows pass with zero blocking console errors.
- No secrets are included in Git.
- Privacy and consent regression tests pass.
- AI safety routing passes deterministic tests independent of model wording.
- Mobile and desktop navigation remain usable.
- A tested checkpoint is saved before additional feature work.

13 DEPLOYMENT AND OPERATIONS

13.1 Pre-Production Requirements

- Provision managed database, application hosting, secrets management, logging, monitoring, backups, and disaster recovery.
- Rotate all development/demo credentials and generate a strong production JWT secret.
- Configure approved CORS origins and HTTPS-only cookies/token strategy appropriate to the final architecture.
- Activate ANCR SSO and map ANCRID claims to VIEARTA roles without duplicating identities.
- Establish institutional resource routing, crisis information, support ownership, response expectations, and content governance.

- Complete privacy, accessibility, security, and legal review for the actual institution and jurisdictions served.
- Load approved VIEARTA video/audio content and confirm rights, captions, transcripts, and accessibility metadata.

13.2 Operational Ownership

PROGRAM TEAM	Learning content, resources, circles, playlists, staff workflows, moderation, and escalation practices.
ANCR ENGINEERING	SSO, deployment, notifications, video rooms, shared storage, observability, backups, and platform security.
INSTITUTION	Student-support resources, policy alignment, privacy notices, emergency routing, accommodations, and staff authorization.
PRODUCT LEADERSHIP	Scope, brand fidelity, roadmap approval, acceptance, and change control.

14 ROADMAP AND TECHNICAL DEBT

PRIORITY	ITEM	RATIONALE
P1	Activate ANCR SSO	Eliminate separate sign-in and establish shared creator identity.
P1	Add managed object storage	Enable direct approved MP4/MP3 uploads and media lifecycle management.
P1	Load real VIEARTA content	Replace written-only placeholders with owned or licensed media.
P1	AI-personalized dashboard recommendations	Layer approved AI assistance on top of existing deterministic rules.
P1	Institution opt-in faith pathway	Provide separately governed optional spiritual reflection content.
P2	Split programs.py by domain	Improve maintainability for circles, learning, media, playlists, and support.
P2	Atomic RSVP capacity guard	Prevent race conditions during simultaneous registration.
P2	Refresh tokens and brute-force protection	Harden authentication for production.

P2	Notifications and reminders	Connect check-ins, circles, learning, and recovery to ANCR notifications.
P2	Mentor consented views	Activate the reserved mentor role with granular permission enforcement.
P3	Barcode analytics	Support personal packaged-food history without public comparison.
P3	Expanded institution configuration	Resources, content tracks, retention, branding, and policy controls.

15 ACCEPTANCE CRITERIA

- A student can authenticate, complete onboarding, submit a check-in, and see persisted personalized dashboard data.
- A student can log meals, macros, hydration, barcode products, mindfulness, movement, habits, journal entries, and reflections with persistent, private storage.
- Learning lessons launch relevant real-life tools and award participation credit only after required reflection.
- Performance and recovery experiences run through functional timed steps and record completion.
- Students can RSVP to available circles, access authorized join links, participate in scoped chat, and view approved circle media.
- Administrators can manage approved media, playlists, join links, resources, and support workflows without seeing unconsented student data.
- Viea responds end-to-end, handles latency/failure states, retains user-scoped history, and applies deterministic crisis/medical routing.
- Consent defaults off and is enforced across administrative endpoints.
- No unsafe URL schemes, exposed secrets, cross-user data leaks, fake players, public rankings, or diagnostic claims are present.
- The full automated test suite and frontend critical-flow checks pass before release.

A APPENDIX A — SEEDED DEMONSTRATION EXPERIENCE

The current demonstration environment includes a representative student-creator profile, historical check-ins, upcoming events, learning progress, meals, hydration, saved meals, affirmations, mindfulness, movement, habits, journal entries, circles, media, playlists, and Viea history sufficient to demonstrate end-to-end behavior.

NAME	Jaylen Rivers
-------------	---------------

ROLE	Student creator
DISCIPLINE	Artist · Producer · Songwriter
ANCRID	ANCRID-7G8X
PURPOSE	Demonstration of personalized creator-wellness workflows

Credentials are intentionally excluded from this shareable specification. Authorized reviewers should receive time-limited access through a secure channel.

B

APPENDIX B — CONTENT GOVERNANCE

- Use only VIEARTA-owned, institution-owned, or properly licensed media.
- Require captions and transcripts for instructional video where applicable.
- Record source, rights owner, expiry, content reviewer, and accessibility status for each media item.
- Do not seed random public videos into the production experience.
- Separate optional faith-based content from general mindfulness and require institutional opt-in.
- Review clinical, nutrition, movement, crisis, and accessibility content with appropriately qualified professionals before production use.

C

APPENDIX C — CLAUDE DESIGN AND DEVELOPMENT GUARDRAILS

- Treat this document as the authoritative functional baseline.
- Do not rename products, redraw logos, invent brands, or change established navigation without product approval.
- Do not remove privacy, safety, consent, accessibility, or user-isolation requirements for visual simplicity.
- Do not replace functional components with static mockups.
- Preserve the existing React/FastAPI/MongoDB architecture unless an approved migration plan is provided.
- When proposing enhancements, label them as proposed and keep them separate from implemented requirements.
- Never place secrets, credentials, or personally sensitive student data in prompts, screenshots, repositories, or design files.
